

# Adoption

## About Sound Therapy:

Sound-based therapy involves the use of sound vibration that impacts the body using special equipment, programs, modified music, and/or specific tones/beats, the need for which is identified with appropriate testing.

## About Adoption:

Adoption of a child can occur at any age and be private, domestic, or international. Unknown family histories, developmental challenges, bonding issues, and more can impact their overall functioning.

## Therapies Offered:

AIT, Tomatis®, Fast ForWord™, Interactive Metro-nome™, BioAcoustics™, and home programs Therapies are only suggested after completing the Diagnostic Evaluation for Therapy Protocol (DETP®) which determines if any sound-based therapy is appropriate and when it is, in the correct order. We utilize *The Davis Model of Sound Intervention®*.

## Adoption and Sound-Based Therapy:

Sound-based therapy supports positive change with:

- o Family bonding, especially maternal
- o Lack of early sensory stimulation
- o Weak early development skills
- o Delayed speech and language skills
- o Body movement and coordination
- o Communication skills
- o Sense of self
- o Reading skills
- o Determination of body imbalances related to:
  - Genetic issues
  - Metal toxicities
  - Vaccination responses
  - Biochemical issues
  - Nutritional weaknesses

Sound-based therapies are not medical treatments. They do not cure or treat medical disease conditions. They work on supporting change in learning, development, and well-being. The work of The Davis Center is no substitute for a medical diagnosis and treatment.

With over 40+ years experience, The Davis Center is the World's Most Comprehensive Sound Therapy Center!
