

# Adoption

## About Sound Therapy:

Sound-based therapy involves the use of sound vibration that impacts the body using special equipment, programs, modified music, and/or specific tones/beats, the need for which is identified with appropriate testing.

## About Adoption:

Adoption of a child can occur at any age and be private, domestic, or international. Unknown family histories, developmental challenges, bonding issues, and more can impact their overall functioning.

## Therapies Offered:

AIT, Tomatis®, Fast ForWord™, Interactive Metronome™, BioAcoustics™, and home programs Therapies are only suggested after completing the Diagnostic Evaluation for Therapy Protocol (DETP®) which determines if any sound-based therapy is appropriate and when it is, in the correct order. We utilize *The Davis Model of Sound Intervention®*.

## Adoption and Sound-Based Therapy:

Sound-based therapy supports positive change with:

- o Family bonding, especially maternal
- o Lack of early sensory stimulation
- o Weak early development skills
- o Delayed speech and language skills
- o Body movement and coordination
- o Communication skills
- o Sense of self
- o Reading skills
- o Determination of body imbalances related to:
  - Genetic issues
  - Metal toxicities
  - Vaccination responses
  - Biochemical issues
  - Nutritional weaknesses

Sound-based therapies are not medical treatments. They do not cure or treat medical disease conditions. They work on supporting change in learning, development, and wellness. The work of The Davis Center is no substitute for a medical diagnosis and treatment.

With over 40+ years experience, The Davis Center is the World's Most Comprehensive Sound Therapy Center!
